

AI FOR SOCIAL GOOD

AI Safety Conversation Poster

Have a classroom or group discussion around the “always rules” and the “never rules” of AI. This is the starting point to helping us all understand the safe way to use AI for good in our world. Which rule do you think is the most important?

ALWAYS

Do these every single time

Ask a grown-up first

Use AI with an adult you trust nearby.

Double-check the answers

AI can make mistakes, check with a human.

Use kind words

Practice kindness, even when you talk to AI.

Tell a grown-up

If anything feels weird or scary, speak up.

NEVER

Not even one time

Share your secrets

No name, school, address, or photos.

Believe everything

AI sounds sure even when it's wrong.

Keep a worry to yourself

Scary or strange? It's never a secret.

Pick screens over people

Real friends and real hugs come first.

The Golden Rule: When you're not sure ask a trusted grown-up!
