

AI FOR SOCIAL GOOD

The Big Moonshot: AI Edition

Pick a big problem in the world. Dream up a bold way to help solve it with AI as your co-pilot.

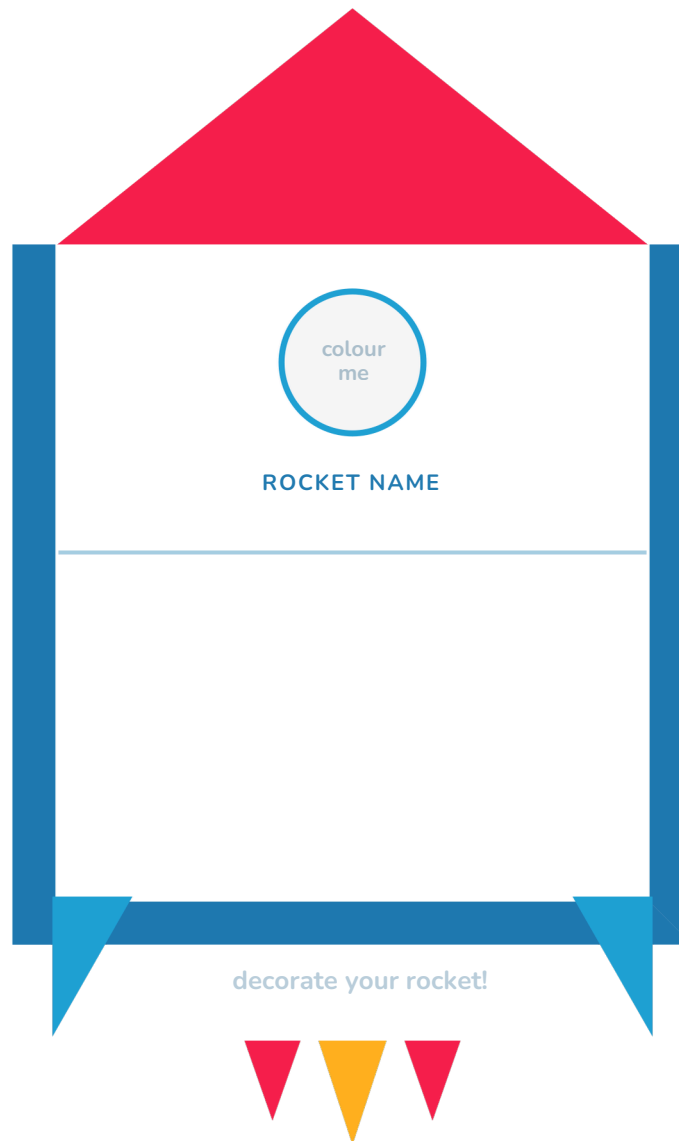

What's a moonshot? A moonshot is a HUGE, dream-big goal, the kind that could help thousands of people. It feels almost impossible... until a crew works together, does the research, and takes the first small step to move towards the dream.

1 Decorate your rocket.
As a group, name it and design it as your crew's symbol.

2 Answer the guiding questions
to find a problem worth solving.

3 Fill in your Mission Briefing.
Research it, then sign off for launch!

DESIGN YOUR MISSION ROCKET AS A CREW!

Big enough for the whole crew to be creative. Draw, colour, and add your own unique design. Your rocket carries your crew's big idea to the moon!

Find Your Mission

Guiding questions to help your crew choose a big problem worth solving.

Talk it through as a crew. There are no wrong answers here, these questions warm up your thinking, creativity and connection so you're ready to fill in your Mission Briefing on the next page.

1 What problems do we notice around us?

Look at our school, our community, and the wider world.

2 Which problem do we care about most, and why?

3 Who is affected by this problem?

Think about the people, places, or animals that may be harmed or hurt.

4 What would change if we helped solve it?

5 How big could our idea be?

Dream large! A moonshot helps many.

AI FOR SOCIAL GOOD

Mission Briefing: Investigate the Problem

Before a real moonshot launches, the crew does the research. Prove your problem is big and worth solving. Get prepared for launch.

MISSION NAME

CREW (OUR CLASS)

LAUNCH DATE

1 The problem on our radar

What big problem in our school, community, or world do we want to help solve?

2 Why it's a BIG problem, the evidence

Real facts and numbers make your case strong. Investigate before you launch.

The facts that prove it's big: _____

How many people are affected: _____

What happens if no one solves it: _____

3 Co-pilot check-in: fact-find with AI (with your teacher!)

We asked our AI co-pilot: _____

The facts it found: _____

Where our facts come from (sources): _____

How we double-checked they're true: _____

4 Our moonshot idea to help solve it

Now that we know it's a big problem, the biggest, boldest idea we can imagine. Dream large!

Our Launch Steps: One Small Act at a Time

You won't solve your moonshot idea in one day, but you can start. Plan 7 small steps your crew could take to get started right now.

A moonshot takes time. Just like 365give is **changing the world one small act of giving at a time**. Our moonshot is to **activate the entire world!** That takes time, effort, volunteers, and people like all of you. **Each day, one small action touches one person.** What could your crew do, step by step, to fuel your big moonshot?
