AI FOR SOCIAL GOOD · GRADES 6–12

AI for Good

What you ask AI matters. What you do with the answer matters more.

INDIVIDUAL OR GROUP

AI will answer almost anything you ask it. That makes the question you choose to ask the most important part.

KIND is your prompt check. Use it to write better questions, think critically about the answers, and turn what you learn into something you can actually do.

STEP 1 The KIND check

K	KIND	**Does my prompt aim to help?** People, animals, the planet or a problem I care about.
I	INCLUSIVE	**Who could be affected or left out?** Ask AI to consider different people, experiences and perspectives.
N	NO PERSONAL INFORMATION	**Am I protecting privacy?** Don't share private information about yourself or someone else.
D	DOUBLE-CHECK	**Can I trust the answer?** Check important facts, sources and recommendations before acting on them.

STEP 2 Build a better prompt

A vague question gets a vague answer. Watch what changes.

STARTING PROMPT	*"How can I help the environment?"*
MAKE IT KIND	*"How could a group of teenagers reduce food waste in our neighbourhood?"*
RUN THE KIND CHECK	Could this help? Who have we included? Have we protected privacy? What information would we need to verify?

AI FOR SOCIAL GOOD · GRADES 6–12

From AI to Action

Write your own prompt. Then decide what to do with the answer.

INDIVIDUAL OR GROUP

STEP 3 Write your own

Start with something you actually care about.

MY PROMPT — Specific beats general. Describe who you want to help, where and what problem you want to solve.

WHAT I CARE ABOUT

MY PROMPT

STEP 4 Run the KIND check on your prompt

K KIND
Does my prompt aim to help?

I INCLUSIVE
Who could be affected or left out?

N NO PERSONAL INFORMATION
Am I protecting privacy?

D DOUBLE-CHECK
What would I need to verify?

STEP 5 From AI to action

Now ask it, then look hard at what came back.

WHAT IDEA DID AI HELP YOU DISCOVER THAT YOU THINK IS WORTH EXPLORING?

WHAT DID YOU NEED TO CHECK OR CHANGE?

WHAT COULD YOU ACTUALLY DO WITH THIS IDEA?

Use AI intentionally. Ask better questions. Think critically about the answers. Then take human action.
