

A THOUGHT EXERCISE

AI or Human?

AI can do some pretty incredible things. But just because it can do something, does that mean it should?

AI can analyze information, generate ideas, spot patterns and help solve problems at a speed humans can't match.

Where does AI help, where do humans matter most, and where are we better together?

Humans bring something different: empathy, lived experience, values, judgment, imagination and the ability to care.

So where does AI help? Where do humans matter most? And when are we better together?

DECIDE TODAY WHAT'S RIGHT FOR YOU.

MARK ONE FOR EACH SITUATION

	AI	HUMAN	BETTER TOGETHER
01 Write an important personal email to someone you care about	☐	☐	☐
02 Research symptoms and diagnose a health concern	☐	☐	☐
03 Find solutions to a problem in your community	☐	☐	☐
04 Help a friend work through a problem	☐	☐	☐
05 Develop an idea for a new business or project	☐	☐	☐
06 Plan a campaign for a cause you care about	☐	☐	☐
07 Decide whether information online is trustworthy	☐	☐	☐
08 Create something that represents your voice	☐	☐	☐
09 Turn an idea for positive impact into a realistic plan	☐	☐	☐
10 Make a decision that could affect someone else	☐	☐	☐

BETTER TOGETHER FOR GOOD

AI can help us research, organize, analyze, generate and build.

Humans bring empathy, experience, values, imagination and the decision to care.

What problem in your community or the world could you approach differently by combining what AI does well with what you do best?

AI can expand what's possible. Humans decide what matters.

What we do with both is up to us.
